DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 31 January 2006 has been entered.

Election/Restrictions

2. Claim 1 is generic and allowable. Accordingly, the restriction requirement as to the encompassed species is hereby withdrawn and claims 10 and 18, directed to the species of a termination resistor provided on a semiconductor die, are no longer withdrawn from consideration since all of the claims to this species depend from or otherwise include each of the limitations of an allowed generic claim.

In view of the above noted withdrawal of the restriction requirement as to the linked species, applicants are advised that if any claims depending from or including all the limitations of the allowable generic linking claims be presented in a continuation or divisional application, such claims may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application. Once a restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. See *In re Ziegler*, 44 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

Allowable Subject Matter

3. Claims 1, 3-8, 10, 18, and 26-38 are allowed.
4. The following is an examiner's statement of reasons for allowance:

Art Unit: 2813

The primary reason for allowance of claim 1 and all claims dependent thereon is the recitation of the specific direct connections between the terminals of the first, second, and third MOSFET transistors and the resistor element.

The prior art relating to termination resistor circuits either lacks one or more of the claimed components (see the IEEE article to Griffin et al., cited by the Applicant), or includes all of the components, but connects them in a vastly different circuit arrangement than that in claim 1 (see US 6,429,685 to Stockstad; US 5,821,768 to Rau; US 6,351,138 to Wong; US 6,388,495 to Roy; or US 6,560,290 to Ahn). Since the specific circuit arrangement directly influences critical parameters for a termination circuit, such as the degree of I-V linearity, the range of voltages over which the response is linear, the degree to which temperature and process variations are compensated, and the overall size of the termination circuit, and since the prior art provides no teachings or even suggestions of the claimed circuit arrangement, it is the Examiner's opinion that the specific arrangement of circuit elements as claimed would not have been obvious to a person having ordinary skill in the art.

The reasons for allowance of claim 29 are deemed to be of record, as set forth in the Office Action of 31 October 2005.

5. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
